

REDFINN 6M SPORTS FISHER

WORLD CLASS SPORTFISHERS

The smallest of our Redfinn range is the Redfinn 6M, designed by John Moxham to be a fisherman friendly, day angler for long distance fishing trips that is highly fuel efficient and built on the success of our Redfinn 6000 series.

The Redfinn 6M is our “big small boat” available in both open, cuddy or canopy versions. The 6M has its own distinctive style and design and with many different specifications available there is a Redfinn 6M for everyone.

From a safety perspective the Redfinn 6M is unsinkable, self-bailing, with no wood, no rot and no maintenance and can be towed easily yet still sea worthy. That's an ambitious criteria for a boat under 20' in length especially as it has a Category C licence for 6 Fishermen, their gear and catch !

The inside of the boat is open planned for maximum space for fishing with a walkabout flat floor. Like the original Redfinn 6000, the Redfinn 6M was built for outboards and it will take up to 100hp.

Specifications:

Length Overall:.....	6 metres (19' 7")
Overall Beam:.....	2.1 metres (6' 9")
Dry Weight.....	550 KG
Engine Weight (Based on Yamaha F70).....	118 KG

4 Door Folding Bulkhead addition to Redfinn 6M (with Cab):	£ 16,000

Customer Testimonial:

The Redfinn 6M is simply just Superior in almost all departments for the serious angler:

"The other day, after Steve and I (my partner in the Redfinn 6M) had yet again placed 1 & 2 in a competition I heard an interesting comment, "It's alright for them, they got a Redfinn"! It is true to say that since we took our first Redfinn (6000) some years ago that we have pretty much cleaned up on the local match scene, Not won them all but a lot more than our fair share!

The reasons, well, easy controllable, fishing. Drifting is a real pleasure and when the wind is too strong we use a drogue to great affect, infact used correctly we have "stopped" the boat over wrecks and rock marks when all others are drifting almost out of control.

At anchor you have all the shelter that you need in an open boat and so again the comfort aspect is second to none. A very quick soft ride on a boat that recovers extremely well and as your advert says minimal fuel.

As you know I have owned several different boats but in its class the Redfinn 6M is simply just Superior in almost all departments for the serious angler. It must be, we have had three of them!

Thanks for the boat, Cheers!"

Andy, UK
