Grip Pad Sizes: 275 x 135 mm 550 x 135 mm 412 x 203 mm

Also available in the Treadmaster Marine range:

Atlanteak teak effect decking, Accessories

Treadmaster Non-Slip Deck Covering

Produced from a controlled blend of polymers and cellular materials. Treadmaster is supplied as a durable, homogenous sheet, which is cut to the desired shape and bonded directly onto the deck surface.

The widely recognised Treadmaster diamond pattern non-slip deck covering providing the ultimate in grip through a wide range of operating conditions. Treadmaster is the world leader in anti-slip decking combining exceptional slip resistance with durability and comfort in wet and dry conditions. It provides a high degree of insulation and reduces reflective glare from deck surfaces. There are distinct safety advantages, in the event of fire, the material being self-extinguishing and meeting the requirements of BS476 class 2 for surface spread of flame. Having a light sheet weight (approx. 2.0 - 2.5kg/m) Treadmaster does not affect the performance or stability of the craft.

Pattern: Diamond, Smooth or Teak Effect.

Dimensions: 1200x900mm

Thickness: 3mm

CLEANING AND MAINTAINING:

Treadmaster Original is unaffected by exposure to sea water. Its specially designed nitrile rubber/PVC formulation resists the chemical effects of oil, fuel and other commonly used substances, however any spillages should be cleaned up promptly to avoid surface staining.

Cleaning of spillages should be carried out using a cloth or soft brush and warm water containing a mild detergent. The surface is rubbed very gently to remove the spillage, then rinsed with plain water.

Cleaning fluids containing bleach, and abrasive cleaners, must never be used.

Being a substantially natural product, some colours may show a degree of fading after a period of exposure to the elements. If required, the colour can be readily restored using the new brush-applied 'Treadcote', specially developed to refurbish old and faded or stained Treadmaster Original.

The Treadmaster Original range has been the leader in anti-slip decking since the 1950's. Tiflex is the manufacturer of the famous 'Diamond Pattern' decking and has many years of proven success being fitted on both leisure and working boats.

The Original range not only comes in the hard wearing Diamond Pattern where safety and durability are paramount, but also in a Smooth Pattern which still gives excellent anti-slip but is ideally suited for barefoot and sun deck areas. Available in 8 popular colours.
